### Other Elements by this Professional

- **Light and Enlightenment**
- **Framing Views**

The spaces incorporate sustainable design features such as exterior light shelves and perimeter daylight harvesting enhanced by high performance glass, skylights, and multiple level photocell control of artificial light. These techniques bring daylight deep into the building for comfortable, natural illumination without excessive cooling costs. The comprehensive interior design of public space relates directly to the existing finishes palette and consists of natural, sustainable materials which extend, enlarge and enrich the durable campus design vocabulary.

### Additional Info:

The 26,000 gross square foot public university library project was a government sponsored 2006 Design-Build competition winner.

### Materials:

- 1) Glass fiber reinforced cement panels
- 2) Kynar painted aluminum glass
- 3) Kallwall polycarbonate & fiberglass
- 4) Fired clay masonry

**University:** Utah Valley University | Orem, Utah
